PROFILE

I'm a front-end developer based in Toronto, Canada and I speak both code and people as a former HR professional! I'm passionate about leveraging technology to create the best user experience, and have brought to life many projects that make day-to-day processes and services way better for the end user in mind. Driven by this, I'm happiest when I'm learning, sharing, creating and thinking about how to make things better.

SKILLS

- HTML5
- CSS3
- Sass
- Git
- Firebase
- VS Code

Web Development 101, Jul to Aug 2020

York University
Bachelor of Commerce, 2012 to 2017

University of Windsor
*Bachelor of Arts*, 2008 to 2012

RECENT PROJECTS

Think Mindful | React.js & Firebase
A SPA built in React with CRUD functionality, Think Mindful allows the user to keep a thought record journal for therapy. Firebase was used for authentication and a real-time database.

Ethical Makeup | React.js, REST API & Firebase
Built to meet a client brief as a mob programming project, this app utilizes a REST API to allow users to search for ethical cosmetic products that meet a specific query. Users are able to view product details, read and write reviews, as well as add products to a wishlist.

Kitty Clicker | jQuery & Firebase
Accessible, interactive game where the user clicks or taps a kitty as many times as they can for 30 seconds. jQuery was used to manipulate the DOM and Firebase was used to create a real-time leaderboard.

WORK EXPERIENCE

HR, Workplace Safety & Insurance Board (WSIB)
Feb 2018 to Jan 2020
- Won **Golden Telephone Award, Service Excellence** for implementing technology solution for paper-based process
- Built a knowledge mgmt. solution using HTML, CSS and jQuery - solution was use case for leveraging technology skills within HR and I was invited to present to senior leadership and a >100 person town hall to encourage innovation
- Managed the rebuild of department SharePoint site using markdown and JavaScript

HR Generalist, Toronto Public Library
June 2017 to Feb 2018
- In addition to day-to-day duties, managed the content and markdown for SharePoint pages
- Created onboarding and knowledge management system for team of 8 with high turnover from scratch

HR Associate, Lakeridge Health
Oct 2016 to June 2017
- Designed SharePoint form process that worked with HRMS and Outlook based on business logic, implemented with Nintex

HR Coordinator, York University
Sept 2013 to Sept 2016
- Main point of contact as a SME during new CMS implementation for intranet, responsible for all copy and markdown as well as design
